

Q1. Given the Wikipedia definitions on data and information, what is your own take on this and specifically what is the difference between data and information?	Information resolves uncertainty, Data: observed values
Q2. From the Manovich reading, what is the difference between visualization and mapping?	Visualization: Bring ideas inside your head out to reality; Mapping: Illustrate the data
Q3. When Manovich states that visualization is the anti-sublime art what is he referring to? Do you agree with this notion?	Sublime: Something that is beyond the limit of human's sense (read: beyond our understanding). Visualization helps capture it into a form that human can comprehend
Q4.	in class group discussion
Q5. Jer Thorp	<ul style="list-style-type: none"> ○ Data as Process and Exploration ○ Constructing Identity ○ Data as Symbol vs Images ○ Creating Data Narratives ○ Data as interface
